

We claim:

1. A scented thin layer article adapted for providing a covering for an interior household surface, said article comprising:
  - a thin layer of a spunbond polymeric material; and
  - a scent agent disposed on or incorporated in said thin layer.
2. The article of claim 1 wherein said polymeric material is a polyolefin selected from the group consisting of polypropylene, polyethylene, polyethylene terephthalate, polyamide, and combinations thereof.
3. The article of claim 2 wherein said polymeric material is polypropylene.
4. The article of claim 1 wherein said spunbond polymeric material has a basis weight from about 5 g/m<sup>2</sup> to about 800 g/m<sup>2</sup>.
5. The article of claim 4 wherein said spunbond polymeric material has a basis weight of from about 10 g/m<sup>2</sup> to about 200 g/m<sup>2</sup>.
6. The article of claim 1 wherein said thin layer of spunbond polymeric material is a laminate of at least two layers of spunbond fibers, wherein said laminate has a total weight of from about 3.5 ounces/yd<sup>2</sup> to about 4.1 ounces/yd<sup>2</sup>.
7. The article of claim 6 wherein said laminate includes a first layer of spunbond fibers weighing about 1.5 ounces/yd<sup>2</sup>, a second layer of meltblown fibers weighing about 0.8 ounces/yd<sup>2</sup>, and a third layer of spunbond fibers weighing about 1.5 ounces/yd<sup>2</sup>.
8. The article of claim 1 wherein said article has a thickness of from about 35 mils to about 40 mils.
9. The article of claim 1 further comprising:

a layer of an adhesive disposed on said thin layer of said spunbond polymeric material.

10. The article of claim 9 wherein said adhesive is a pressure sensitive adhesive.

11. The article of claim 10 wherein said pressure sensitive adhesive is selected from the group consisting of acrylic adhesives and rubber resin adhesives.

12. The article of claim 9 further comprising:  
a release layer in contact with said adhesive layer.

13. A scented sheet adapted for covering a surface, said sheet comprising:  
a thin layer of a spunbond polymeric material, said thin layer defining a first face and a second oppositely directed face;

an adhesive disposed on said first face of said thin layer of said spunbond material; and

a scent agent disposed on or incorporated within at least one of said thin layer of said spunbond material and said adhesive.

14. The scented sheet of claim 13 wherein said polymeric material is polypropylene.

15. The scented sheet of claim 13 wherein said thin layer of said spunbond polymeric material has a weight of from about 3.5 ounces/yd<sup>2</sup> to about 4.1 ounces/yd<sup>2</sup>.

16. The scented sheet of claim 13 wherein said scented sheet has a thickness of from about 35 mils to about 40 mils.

17. The scented sheet of claim 13 further comprising:  
a removable release layer in contact with said adhesive.

18. The scented sheet of claim 13 wherein said adhesive is a pressure sensitive adhesive.
19. The scented sheet of claim 18 wherein said pressure sensitive adhesive is selected from the group consisting of acrylic adhesives and rubber resin adhesives.
20. A scented thin protective sheet comprising:
- a layer of a spunbond polypropylene, said spunbond polypropylene layer defining a first side and a second side opposite from said first side;
  - a layer of a low-tack adhesive disposed on said first side of said spunbond polypropylene layer; and
  - a fragrance-emitting composition disposed on at least one of said first side of said spunbond polypropylene layer, said second side of said spunbond polypropylene layer, and said adhesive layer.
